## 1. What is this product?

**Type**: German law governed warrants

**Term**: The product does not have a fixed term, subject to exercise by you or termination by the product issuer

**Objectives** (Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of a cash payment following exercise by you or termination by us that will depend on the performance of the **underlying**. The product has no fixed term. The product may terminate at any time as described below. If, upon termination of the product, the **underlying** has risen to or above the **stop loss level**, the product will return less than your initial investment or even the minimum payment amount of EUR 0.001, which means you will effectively lose your initial investment. Returns from an investment in the product may be achieved by means of the purchase and subsequent resale of the product.

Leverage: The product offers leveraged exposure to the performance of the **underlying**. This means that the payment you receive following exercise by you or termination by us increases on a magnified basis as the performance of the **underlying** decreases, but you also bear a greater loss if the **underlying** performs positively.

Stop loss event: If the price of the **underlying** at any time during the term of the product is at or above the **stop loss level**, the product will terminate immediately and you will receive a cash amount equal to (A) (1) the **strike price** minus (2) a price for the **underlying** based on the highest price of the **underlying** published by the **reference source** during the three-hour period immediately following the **stop loss event** during which the **underlying** is calculated and published, multiplied by (B) the **entitlement**, subject to a minimum of EUR 0.001.

Exercise by you or termination by us: You may exercise the product on certain dates and subject to the notice periods set out in the product terms (see "7. Other Relevant Information" below for more information on where you can obtain the product terms). We may also terminate the product on certain dates and subject to the notice periods set out in the product terms. The exercise or termination, as the case may be, will be effective after the period of time indicated in the product terms.

Unless a **stop loss event** has occurred, you will in both cases on the **settlement date** receive a cash amount equal to (1) (A) the **strike price** on the **valuation date** minus (B) the **reference price** on such date multiplied by (2) the **entitlement**, subject to a minimum of EUR 0.001.

Following the issuance of the product, the **stop loss level** and the **strike price** will be adjusted for current market conditions and a financing rate. The financing rate is calculated and accrued daily based on an overnight floating rate minus a spread. Updated information on the levels of such components will be available from the product issuer and will be published on www.jpmorgan-zertifikate.de.

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the product issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlying**, the product and the product issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

The product is available for trading on the listing venue(s) (see "5. How long should I hold it and can I take money out early?" below for more information on the listing venue(s)).

2. they seek leveraged performance, expect the movement in the underlying to perform in a way that generates a favourable return, have an investment horizon of the recommended holding period specified below and understand that the product may terminate early;

## 2. What are the risks and what could I get in return?

Risk indicator

| 1 | 2 | 3 | 4 | 5 | 6 | **7** |
|---|---|---|---|---|---|---|

**Lower risk** **Higher risk**

**The risk indicator assumes you keep the product for 1 day. The actual risk can vary significantly if you cash in at an early or a later stage and you may get back less.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact our capacity to pay you.

**To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

## 3. What happens if the issuer is unable to pay out?

You are exposed to the risk that the issuer or guarantor might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.
