1. What is this product?

Type — German law governed warrants

Term — The term of the product ends on the **settlement date**

Objectives (Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of a cash payment following exercise by you or on the **settlement date** that will depend on the performance of the **underlying**. If, upon exercise or termination of the product, the **reference price** of the **underlying** has fallen to or below USD 360.00, the product will return zero. Returns from an investment in the product may be achieved by means of the purchase and subsequent resale of the product, or by letting it expire.

Leverage: The product offers leveraged exposure to the performance of the **underlying**. This means that the payment you receive following exercise by you or on the **settlement date** increases on a magnified basis as the performance of the **underlying** increases, but you also bear a greater loss if the **underlying** performs negatively.

Termination on the settlement date: Following exercise of the product by you or on the **settlement date**, whichever occurs earlier you will receive:

1. if the **final reference price** is above USD 360.00, a cash payment equal to (i) the difference between (x) the **final reference price** and (y) USD 360.00, multiplied by (ii) the **entitlement** and (iii) converted into EUR at the **FX rate**; or
2. if the **final reference price** is at or below USD 360.00, no payment and you will lose your investment.

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the product issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlying**, the product and the product issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

You do not have any entitlement to a dividend from the **underlying** and you have no right to any further entitlement resulting from the **underlying** (e.g., voting rights).

The product is available for trading on the listing venue(s) (see "5. How long should I hold it and can I take money out early?" below for more information on the listing venue(s)).

Intended retail investor — The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have advanced knowledge and a comprehensive understanding of the product, its market and its specific risks and rewards, with relevant financial industry experience including either frequent trading or large holdings in products of a similar nature, risk and complexity;
2. they seek leveraged performance, expect the movement in the underlying to perform in a way that generates a favourable return and have an investment horizon of the recommended holding period specified below;

3. they accept the risk that the issuer could fail to pay or perform its obligations under the product and they are able to bear a total loss of their investment; and
4. they are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

2. What are the risks and what could I get in return?

Risk indicator

1	2	3	4	5	6	**7**

Lower risk — Higher risk

The risk indicator assumes you keep the product for 1 day. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period		**1 day**
Example Investment		**EUR 10,000.00**
Scenarios		***If you exit after recommended holding period***
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**	
Stress scenario	**What you might get back after costs** Percentage return (not annualised)	EUR 2,614 -73.86%
Unfavourable scenario	**What you might get back after costs** Percentage return (not annualised)	EUR 7,979 -20.21%
Moderate scenario	**What you might get back after costs** Percentage return (not annualised)	EUR 9,283 -7.17%
Favourable scenario	**What you might get back after costs** Percentage return (not annualised)	EUR 10,635 6.35%

The average returns shown in the above table are not annualised, which means they may not be comparable to the average returns shown in other key information documents.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The scenarios shown represent possible outcome calculated based on simulations.

This product cannot be easily cashed in.

3. What happens if the issuer is unable to pay out?

You are exposed to the risk that the issuer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0% annual return).
- EUR 10,000.00 is invested.

Costs over time

Scenarios	*If you exit after recommended holding period*
Total costs	EUR 548
Cost impact*	5.8%

*This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products.

Composition of costs

One-off costs upon entry or exit		If you exit after the recommended holding period
Entry costs	5.5% of the amount you pay in when entering this investment. These costs are already included in the price you pay.	EUR 548
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	Not Applicable

Different costs apply depending on the investment amount.

5. How long should I hold it and can I take money out early?

Recommended holding period: 1 day

Sudden changes in the value of the product can occur frequently, accordingly the recommended holding period is 1 day or less. The value of the product should be monitored constantly.

The product reacts due to its leverage to small price movements of the underlying leading to potential profits or losses within unpredictable timeframes.

The product does not guarantee the possibility to disinvest other than by selling the product through the exchange. No fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable.

Exchange listing	Börse Stuttgart	**Price quotation**	Units
Smallest tradable unit	1 unit		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: J.P. Morgan SE, KID complaints, Complaints Management, TaunusTurm, Taunustor 1, 60310, Frankfurt am Main, Germany, by email to: kontakt.zertifikate@jpmorgan.com or at the following website: www.jpmorgan-key-information-documents.com.
